

Dennistoun has a population of 2,753 children and young people (aged 0-24 years).

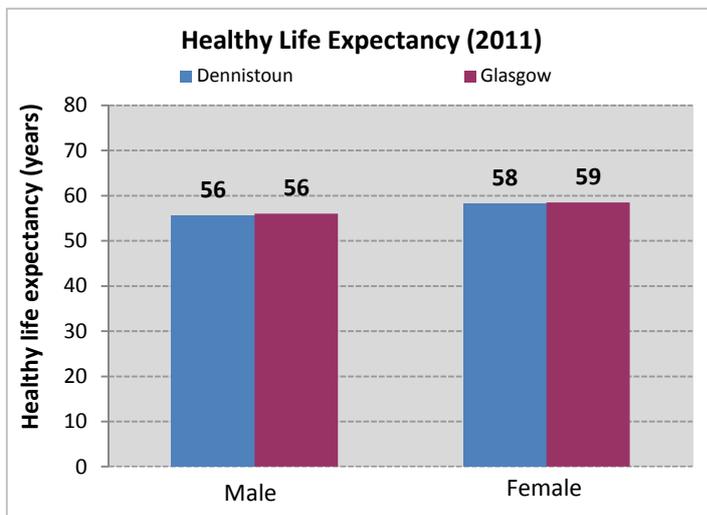

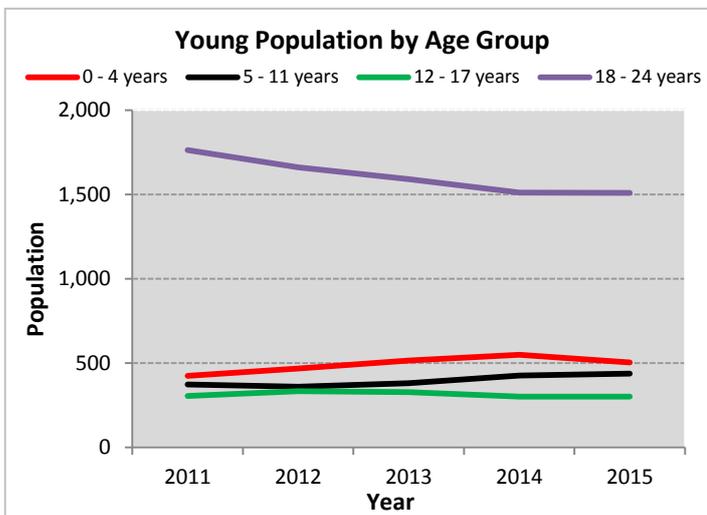

Neighbourhood Comparisons with Glasgow

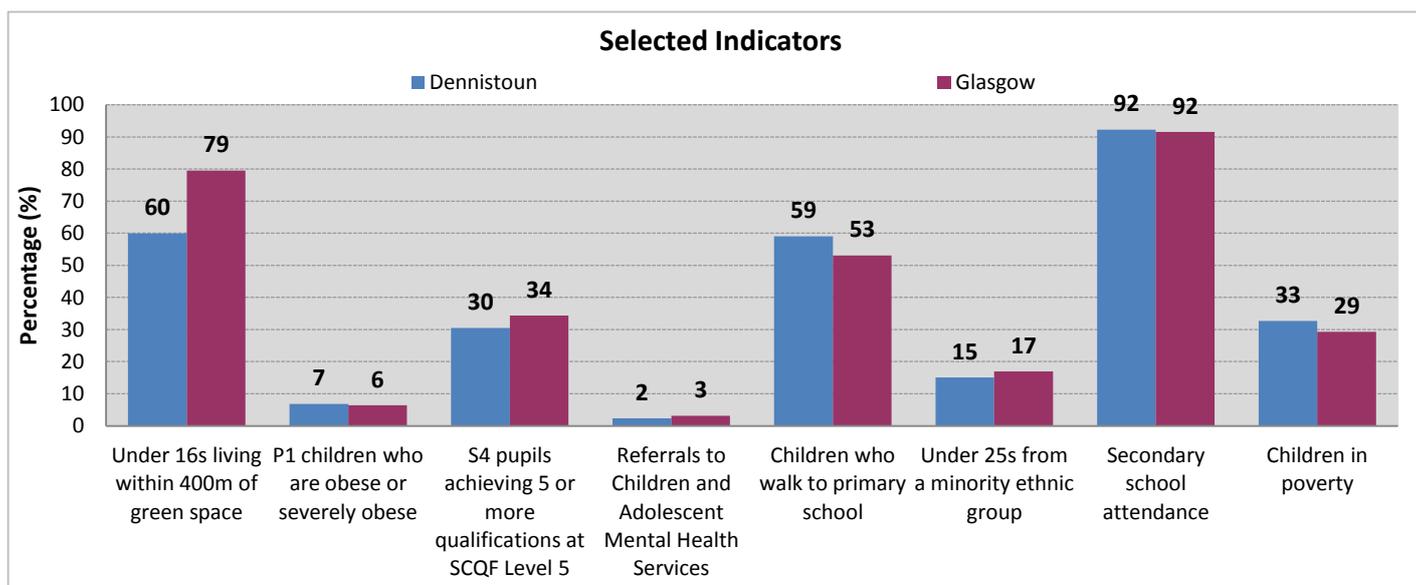

The proportion of school age children in Dennistoun is markedly lower than Glasgow as a whole. 15% of under 25s are from a minority ethnic group. 60% of children live within 400m of green space. The proportion of 16-19 year olds not in employment, education or training (+114%) and the level of overcrowding (+43%) are higher than Glasgow overall. S4 pupil attainment is lower (-11%) than the Glasgow average but 95% of children leaving school go onto a positive destination (higher/further education, employment or training). Likely development difficulties in pre-school children are higher than the Glasgow average (+20%) and communication delay in young children is also higher than average (+31%).

Domain	Indicator	Count	Rate	Difference from Glasgow	Period
Demography	Population aged 0 to 4	504	5%	-14%	2015

	Under 25s whose day-to-day activities are limited by disability	148	5%	-15%	2011

Neighbourhood Trends

The number of 18-24 year olds in Dennistoun has decreased by 14% since 2011, while the numbers of 0-4 and 5-11 year olds have increased by 19% and 17%, respectively. Healthy life expectancy for males is on a par with the Glasgow average but is approximately 1 year lower for females.

Pupil attainment in Dennistoun is lower than in Glasgow overall, while child poverty and P1 obesity levels are higher than the Glasgow average. While fewer children than average live in proximity to green space, primary school children are more likely to walk to school when compared to the Glasgow average. Referrals to children and adolescent mental health services and the proportion of children and young people from minority ethnic groups are slightly lower than the Glasgow average.

Notes

1. Data sources: Census 2011, GCPH, Glasgow City Council, HMRC - Child Poverty Unit, ISD Scotland, National Records of Scotland (NRS), Transport Scotland, Sustrans, Police Scotland, the Scottish Government and the Urban Big Data Centre, Glasgow University.
2. Indicators are aggregated using latest available datazone (2001 or 2011); neighbourhood boundaries based on 2001 datazones.
3. All count figures of less than 5 (denoted as '< 5') have been suppressed to avoid any potential identification.
4. Populations presented in the population trend chart, also used to calculate healthy life expectancy estimates, use NRS small area population estimates for the years 2011 - 2015.
5. 'Healthy life expectancy' is an estimate of the average number of years people are likely to spend in good health. It is shorter than 'life expectancy' because it excludes years likely to be spent in fair or poor health. It is calculated using population estimates, death registrations and self-assessed health from the 2011 Census.
6. Denotes children referred to the Scottish Children's Reporter Administration for an offence or non-offence related reason.
7. A notes and definitions document providing further information on the indicators presented in the profile can be found in the Profiles section of www.understandingglasgow.com/profiles.
