

Glasgow South has a population of 62,903 children and young people (aged 0-24 years).

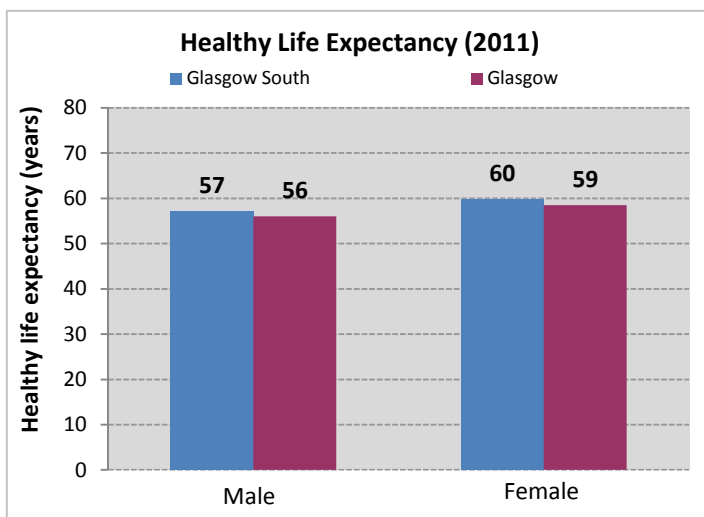

Neighbourhood Comparisons with Glasgow

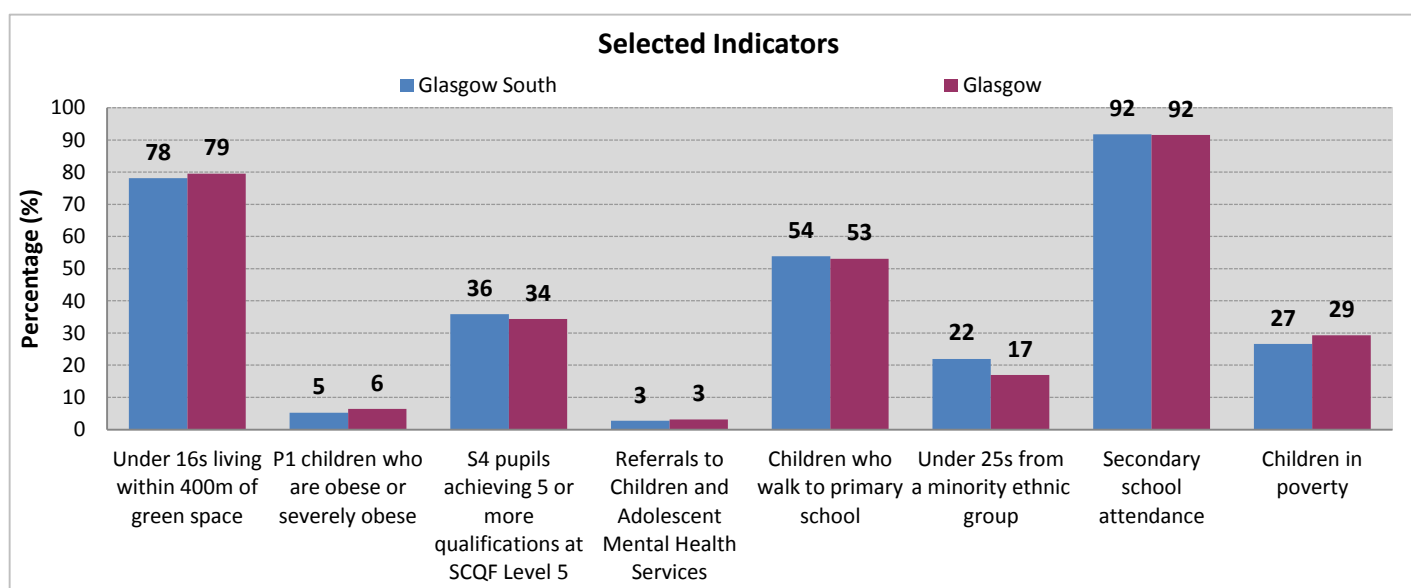

The proportion of school age children in Glasgow South is higher than Glasgow as a whole. 22% of under 25s are from a minority ethnic group. 78% of children live within 400m of green space. The locality has fewer referrals to the Scottish Children's Reporter Administration (-18%) and lower levels of obesity in P1 children (-18%) than in Glasgow overall. S4 pupil attainment is higher (+4%) than the Glasgow average and 90% of children leaving school go onto a positive destination (higher/further education, employment or training). Likely development difficulties in pre-school children are lower than the Glasgow average (-6%) but communication delay in young children is higher than average (+12%).

Domain	Indicator	Count	Rate	Difference from Glasgow	Period
Demography	Population aged 0 to 4	14,106	6%	+9%	2015
	Population aged 5 to 11	16,277	7%	+9%	2015

	Female healthy life expectancy (years)	N/A	59.7	+2%	2011
	Under 25s whose day-to-day activities are limited by disability	3,899	6%	+1%	2011

Neighbourhood Trends

The number of 18-24 year olds in Glasgow South has decreased by 11% since 2011, while the number of 0-4 year olds has increased by 6%. Healthy life expectancy for males and females is approximately 1 year higher than Glasgow as a whole.

Pupil attainment in Glasgow South is slightly higher than in Glasgow overall, while child poverty and P1 obesity levels are marginally lower than the Glasgow average. Although fewer children than average live in proximity to green space, primary age children are slightly more likely to walk to school when compared to the Glasgow average. Secondary school attendance and referrals to children and adolescent mental health services are on a par with the Glasgow average.

Notes

1. Data sources: Census 2011, GCPH, Glasgow City Council, HMRC - Child Poverty Unit, ISD Scotland, National Records of Scotland (NRS), Transport Scotland, Sustrans, Police Scotland, the Scottish Government and the Urban Big Data Centre, Glasgow University.
2. Indicators are aggregated using latest available datazone (2001 or 2011); neighbourhood boundaries based on 2001 datazones.
3. All count figures of less than 5 (denoted as '< 5') have been suppressed to avoid any potential identification.
4. Populations presented in the population trend chart, also used to calculate healthy life expectancy estimates, use NRS small area population estimates for the years 2011 - 2015.
5. 'Healthy life expectancy' is an estimate of the average number of years people are likely to spend in good health. It is shorter than 'life expectancy' because it excludes years likely to be spent in fair or poor health. It is calculated using population estimates, death registrations and self-assessed health from the 2011 Census.
6. Denotes children referred to the Scottish Children's Reporter Administration for an offence or non-offence related reason.
7. A notes and definitions document providing further information on the indicators presented in the profile can be found in the Profiles section of www.understandingglasgow.com/profiles.
