

# Children and Young People's Profile for North Cardonald and Penilee

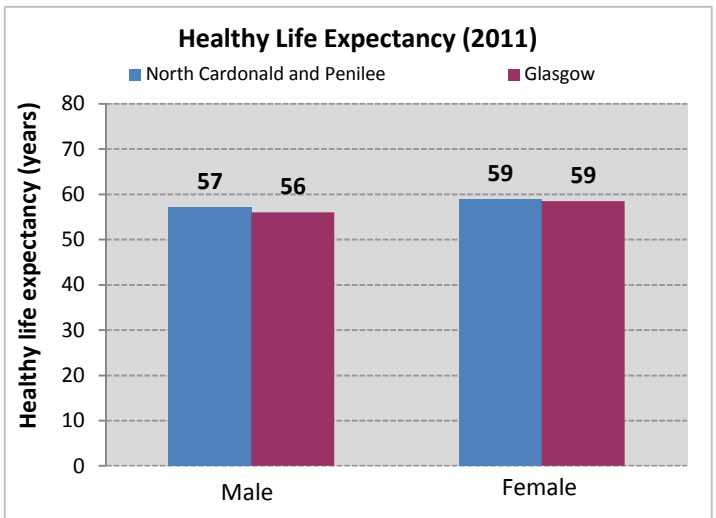

North Cardonald and Penilee has a population of 4,379 children and young people (aged 0-24 years).

## Neighbourhood Comparisons with Glasgow

The proportion of school age children in North Cardonald and Penilee is markedly higher than Glasgow as a whole. 10% of under 25s are from a minority ethnic group. 87% of children live within 400m of green space. The neighbourhood has lower levels of obesity in P1 children (-27%) and fewer babies exposed to passive smoking (-51%) than Glasgow overall. S4 pupil attainment is lower (-13%) than the Glasgow average and 91% of children leaving school go onto a positive destination (higher/further education, employment or training). Likely development difficulties in pre-school children are lower than the Glasgow average (-16%) but communication delay in young children is higher than average (+23%).

Domain	Indicator	Count	Rate	Difference from Glasgow	Period
Demography	Population aged 0 to 4	894	6%	+10%	2015
	Population aged 5 to 11	1,230	9%	+32%	2015
	Population aged 12 to 17	1,027	7%	+33%	2015
	Population aged 18 to 24	1,228	9%	-25%	2015
	Birth rate (per 1,000 pop'n)	156	11.3	-7%	2013

	Referrals to Children and Adolescent Mental Health Services	132	5%	+50%	2015/16
	Male healthy life expectancy (years)	N/A	57.1	+2%	2011
	Female healthy life expectancy (years)	N/A	58.8	+1%	2011
	Under 25s whose day-to-day activities are limited by disability	329	8%	+30%	2011

The number of 5-11 year olds in North Cardonald and Penilee has increased by 9% since 2011, while the number of 0-4 year olds has decreased by 2%. Healthy life expectancy for males is approximately 1 year higher than Glasgow as a whole but is on a par with the Glasgow average for females.

Pupil attainment and P1 obesity levels in North Cardonald and Penilee are lower than in Glasgow overall, while child poverty is on a par with the Glasgow average. More children than average live in proximity to green space and primary school children are slightly more likely to walk to school when compared to the Glasgow average. The proportion of children and young people from minority ethnic groups is lower than Glasgow overall but referrals to children and adolescent mental health services are higher.

## Notes

1. Data sources: Census 2011, GCPH, Glasgow City Council, HMRC - Child Poverty Unit, ISD Scotland, National Records of Scotland (NRS), Transport Scotland, Sustrans, Police Scotland, the Scottish Government and the Urban Big Data Centre, Glasgow University.
2. Indicators are aggregated using latest available datazone (2001 or 2011); neighbourhood boundaries based on 2001 datazones.
3. All count figures of less than 5 (denoted as '< 5') have been suppressed to avoid any potential identification.
4. Populations presented in the population trend chart, also used to calculate healthy life expectancy estimates, use NRS small area population estimates for the years 2011 - 2015.
5. 'Healthy life expectancy' is an estimate of the average number of years people are likely to spend in good health. It is shorter than 'life expectancy' because it excludes years likely to be spent in fair or poor health. It is calculated using population estimates, death registrations and self-assessed health from the 2011 Census.
6. Denotes children referred to the Scottish Children's Reporter Administration for an offence or non-offence related reason.
7. A notes and definitions document providing further information on the indicators presented in the profile can be found in the Profiles section of [www.understandingglasgow.com/profiles](http://www.understandingglasgow.com/profiles).
