

Priesthill and Househillwood has a population of 2,825 children and young people (aged 0-24 years).

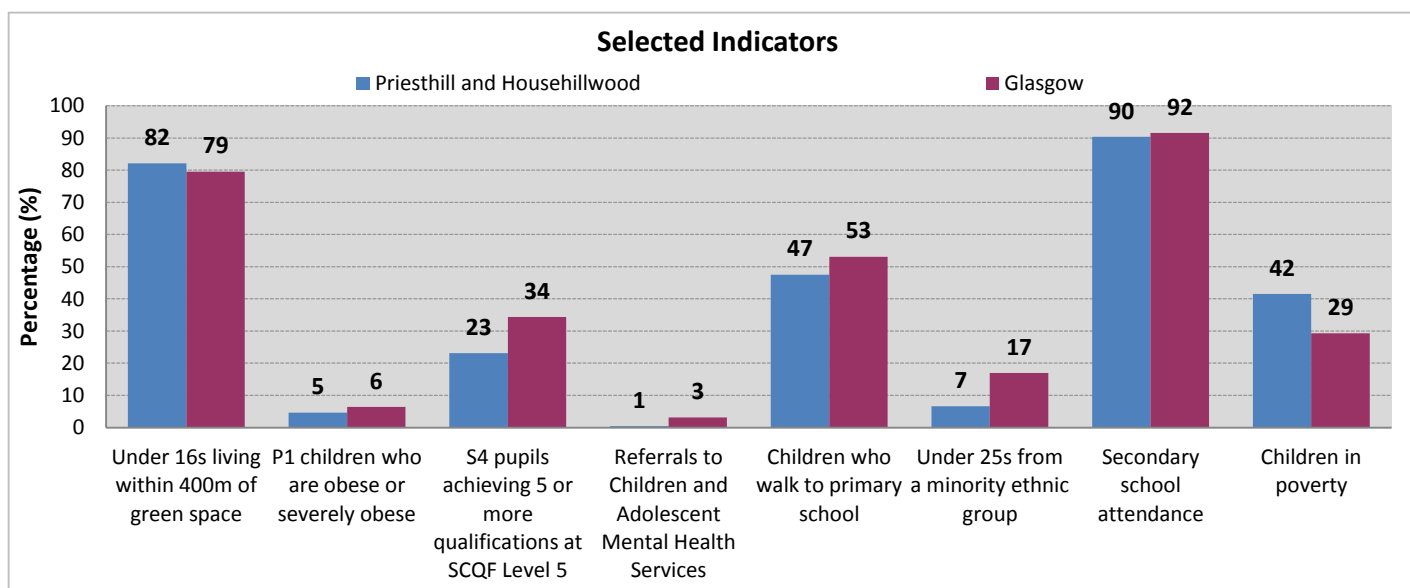

## Neighbourhood Comparisons with Glasgow

The proportion of school age children in Priesthill and Househillwood is markedly higher than Glasgow as a whole. 7% of under 25s are from a minority ethnic group. 82% of children live within 400m of green space. The neighbourhood has more children in poverty (+42%), offenders (+55%), hospitalisations for dental treatment (+34%) and emergency hospitalisations for assault (+63%) than in Glasgow overall. S4 pupil attainment is lower (-33%) than the Glasgow average and 85% of children leaving school go onto a positive destination (higher/further education, employment or training). Likely development difficulties in pre-school children are higher than the Glasgow average (+44%) but communication delay in young children is on a par with Glasgow overall.

Domain	Indicator	Count	Rate	Difference from Glasgow	Period
Demography	Population aged 0 to 4	592	7%		+22% 2015
	Population aged 5 to 11	752	9%		+35% 2015

	Referrals to Children and Adolescent Mental Health Services	9	1%		-84% 2015/16
	Male healthy life expectancy (years)	N/A	51.4		-8% 2011
	Female healthy life expectancy (years)	N/A	52.7		-10% 2011
	Under 25s whose day-to-day activities are limited by disability	217	8%		+29% 2011

The number of 18-24 year olds in Priesthill and Househillwood has decreased by 8% since 2011, while the number of 5-11 year olds has increased by 7%. Healthy life expectancy for males is approximately 5 years lower than Glasgow as a whole and 6 years lower for females.

Pupil attainment in Priesthill and Househillwood is lower than in Glasgow overall. While child poverty is higher, P1 obesity levels are lower than the Glasgow average. Although more children than average live in proximity to green space, primary school children are less likely to walk to school when compared to the Glasgow average. Secondary school attendance and referrals to children and adolescent mental health services are lower than the Glasgow average.

### Notes

1. Data sources: Census 2011, GCPH, Glasgow City Council, HMRC - Child Poverty Unit, ISD Scotland, National Records of Scotland (NRS), Transport Scotland, Sustrans, Police Scotland, the Scottish Government and the Urban Big Data Centre, Glasgow University.
2. Indicators are aggregated using latest available datazone (2001 or 2011); neighbourhood boundaries based on 2001 datazones.
3. All count figures of less than 5 (denoted as '< 5') have been suppressed to avoid any potential identification.
4. Populations presented in the population trend chart, also used to calculate healthy life expectancy estimates, use NRS small area population estimates for the years 2011 - 2015.
5. 'Healthy life expectancy' is an estimate of the average number of years people are likely to spend in good health. It is shorter than 'life expectancy' because it excludes years likely to be spent in fair or poor health. It is calculated using population estimates, death registrations and self-assessed health from the 2011 Census.
6. Denotes children referred to the Scottish Children's Reporter Administration for an offence or non-offence related reason.
7. A notes and definitions document providing further information on the indicators presented in the profile can be found in the Profiles section of [www.understandingglasgow.com/profiles](http://www.understandingglasgow.com/profiles).
