	S4 pupils achieving 5 or more qualifications at SCQF Level 5	75	57%	+67%	2012 - 2013
	Secondary school attendance	N/A	93%	+2%	2013/14
	School leavers with a positive destination	99	94%	+5%	2013
	16 to 19 year olds not in employment, education or training	57	13%	-55%	2012
Health and Wellbeing	Pre-school children with likely development difficulties	N/A	4%	-45%	2012 - 2014
	Referrals to Children and Adolescent Mental Health Services	< 5	0%	-93%	2015/16
	Male healthy life expectancy (years)	N/A	58.8	+5%	2011
	Female healthy life expectancy (years)	N/A	58.9	+1%	2011
	Under 25s whose day-to-day activities are limited by disability	133	5%	-17%	2011

The number of 12-17 year olds in South Nitshill and Darnley has decreased by 7% since 2011, while the number of 5-11 year olds has increased by 16%. Healthy life expectancy for males is approximately 3 years higher than Glasgow as a whole but on a par with the Glasgow average for females.

Pupil attainment in South Nitshill and Darnley is markedly higher than in Glasgow overall, while child poverty and P1 obesity levels are lower than the Glasgow average. Although more children than average live in proximity to green space, primary school children are less likely to walk to school when compared to the Glasgow average. Secondary school attendance is higher than the Glasgow average while referrals to children and adolescent mental health services are lower.

## Notes

1. Data sources: Census 2011, GCPH, Glasgow City Council, HMRC - Child Poverty Unit, ISD Scotland, National Records of Scotland (NRS), Transport Scotland, Sustrans, Police Scotland, the Scottish Government and the Urban Big Data Centre, Glasgow University.
2. Indicators are aggregated using latest available datazone (2001 or 2011); neighbourhood boundaries based on 2001 datazones.
3. All count figures of less than 5 (denoted as '< 5') have been suppressed to avoid any potential identification.
4. Populations presented in the population trend chart, also used to calculate healthy life expectancy estimates, use NRS small area population estimates for the years 2011 - 2015.
5. 'Healthy life expectancy' is an estimate of the average number of years people are likely to spend in good health. It is shorter than 'life expectancy' because it excludes years likely to be spent in fair or poor health. It is calculated using population estimates, death registrations and self-assessed health from the 2011 Census.
6. Denotes children referred to the Scottish Children's Reporter Administration for an offence or non-offence related reason.
7. A notes and definitions document providing further information on the indicators presented in the profile can be found in the Profiles section of [www.understandingglasgow.com/profiles](http://www.understandingglasgow.com/profiles).
