	Overcrowded households with children	432	37%	+104%	2011
Learning and Education	Children with communication delay at 27 to 30 months	67	25%	+6%	2014
	S4 pupils achieving 5 or more qualifications at SCQF Level 5	35	34%	-1%	2012 - 2013
	Secondary school attendance	N/A	91%	-1%	2013/14
	School leavers with a positive destination	84	91%	+2%	2013
	16 to 19 year olds not in employment, education or training	84	19%	-30%	2012
Health and Wellbeing	Pre-school children with likely development difficulties	N/A	6%	-15%	2012 - 2014
	Referrals to Children and Adolescent Mental Health Services	16	1%	-71%	2015/16
	Male healthy life expectancy (years)	N/A	56.4	+1%	2011
	Female healthy life expectancy (years)	N/A	58.4	-0%	2011
	Under 25s whose day-to-day activities are limited by disability	157	5%	-9%	2011

The number of 18-24 year olds in Pollokshields East has decreased by 16% since 2011, while the number of 0-4 year olds has increased by 4%. Healthy life expectancy for males is on a par with the Glasgow average and is 1 year lower for females.

Pupil attainment in Pollokshields East is on a par with the Glasgow average, while child poverty and P1 obesity levels are slightly lower. More children than average live in proximity to green space and more primary school children walk to school when compared with the Glasgow average. Secondary school attendance and referrals to children and adolescent mental health services are lower than Glasgow overall while the proportion of children and young people from minority ethnic groups is much higher.

## Notes

1. Data sources: Census 2011, GCPH, Glasgow City Council, HMRC - Child Poverty Unit, ISD Scotland, National Records of Scotland (NRS), Transport Scotland, Sustrans, Police Scotland, the Scottish Government and the Urban Big Data Centre, Glasgow University.
2. Indicators are aggregated using latest available datazone (2001 or 2011); neighbourhood boundaries based on 2001 datazones.
3. All count figures of less than 5 (denoted as '< 5') have been suppressed to avoid any potential identification.
4. Populations presented in the population trend chart, also used to calculate healthy life expectancy estimates, use NRS small area population estimates for the years 2011 - 2015.
5. 'Healthy life expectancy' is an estimate of the average number of years people are likely to spend in good health. It is shorter than 'life expectancy' because it excludes years likely to be spent in fair or poor health. It is calculated using population estimates, death registrations and self-assessed health from the 2011 Census.
6. Denotes children referred to the Scottish Children's Reporter Administration for an offence or non-offence related reason.
7. A notes and definitions document providing further information on the indicators presented in the profile can be found in the Profiles section of [www.understandingglasgow.com/profiles](http://www.understandingglasgow.com/profiles).
